Neelkanth Mehta

Quantitative Researcher & Algorithmic Trader | Python, Machine Learning & Multi-Agent AI | WorldQuant MScFE
Mumbai Metropolitan Region

Summary

Quantitatively trained market professional and WorldQuant MScFE graduate transitioning into algorithmic trading and quantitative research. With over 7 years in financial markets, I bridge the gap between heavy data engineering and Alpha generation. My focus is on systematic strategy development, utilizing Python, end-to-end ML pipelines, and multi-agent AI development frameworks to extract signals from market noise. I recently engineered a multi-factor equity strategy (Quality, Value, Momentum) with a macro timing overlay via QuantConnect LEAN, achieving a Sharpe ratio of 3.09 over a 10-year backtest. **Core Technical Stack**: Quantitative Modeling: Time series analysis, factor modeling, VaR/CVaR, walk-forward validation, stochastic processes. Programming & AI: Python (Pandas, Scikit-Learn, QuantConnect), SQL, multi-agent AI frameworks, end-to-end ML pipelines (XGBoost, LSTMs). Data Engineering: Feature stores, time-series resampling, ETL across large-scale financial datasets (Snowflake, PostgreSQL). I am actively seeking an entry-level Quant Trader or Researcher role where I can deploy rigorous statistical analysis and scalable code to drive systematic trading performance.

Experience

Amherst

4 years 9 months

Senior Analyst

December 2023 - February 2026 (2 years 3 months)

Mumbai

Senior Financial Analyst – Asset & Liability Management (ALM) at Amherst Group, a leading vertically integrated platform for Single-Family Residential (SFR) investment, development, and operations across U.S. real estate. I support the merchant banking division's ALM function, focused on optimizing the performance of debt facilities and enhancing financial transparency.

- Oversee senior debt facility management for ~11,000 SFR units, with Assets Under Management (AUM) of ~\$3Bn
- Develop performance reports, dashboards, and financial periodicals to meet reporting obligations and support strategic decisions
- Actively pursuing Microsoft Power BI certification to deepen expertise in Power Query and the broader Power Platform ecosystem

Analyst

June 2021 - November 2023 (2 years 6 months)

Mumbai, Maharashtra, India

(under payroll of Concentrix Daksh Services India Pvt Ltd)

- Delivered portfolio accounting, budgeting, and analytics for large-scale Single-Family Residential (SFR) investments, enabling data-driven decisions for cross-border investment teams
- Supported valuation analyses and scenario-based financial modeling to enhance capital allocation and optimize risk-adjusted returns
- Utilized advanced Microsoft Excel and Tableau to build dynamic dashboards, streamline reporting workflows, and visualize key performance metrics

Barclays

Encore fellow

February 2020 - June 2020 (5 months)

Mumbai, Maharashtra, India

Encore!, one of Barclays' flagship diversity and citizenship programs, helps individuals who have taken a career break prepare to reenter the workforce.

Joined Macro Business Analytics Team, Mumbai. The core function of the team includes developing and automating mission critical business related reports and dashboards for Barclays Markets vertical leadership.

Individually contributed in a few automation projects that results in significant amount of savings in time and resources.

Skills involved: Python web scraping (using Selenium), Excel modelling with limited use of VBA.

J.P. Morgan

Sr. Portfolio Analyst

May 2016 - August 2018 (2 years 4 months)

Mumbai Area, India

Under Fixed Income LOB of JP Morgan Asset Management vertical.
Analyze and underwrite commercial real estate mortgage portfolio.
Assist in portfolio performance reporting activities.

Education

WorldQuant University

Master of Science in Financial Engineering, Quantitative Finance with focus on
alpha design · (2017 - 2019)

University of Mumbai

B.M.S., management · (2004 - 2007)
